MALLA REDDY ENGINEERING COLLEGE FOR WOMEN

(Autonomous Institution-UGC, Govt. of India)

Accredited by NAAC with 'A+' Grade | Programmes Accredited by NBA

Approved by AICTE, Affiliated to JNTUH, ISO 9001:2015 Certified Institution

Maisammaguda, Dhulapally, Secunderabad 500100.

SMART GARDENING AND SAFETY MONITORING SYSTEM

ABSTRACT:

The Wireless Sensor Network, also known as the WSN, enables Global Sensing cut across several present dwelling zones. The ability to calculate and comprehend environmental indicators is made possible by this. Gardens may experience challenges with dryness and rotting. Through constant monitoring of variables like moisture in the soil, temperature humidity, and water level, the primary goal of this project is to preserve the natural characteristics of the plants. The roots of the plants have sensors placed for these characteristics. The user receives the data that the system has identified. The goal is to use Arduino UNO and Wi-Fi to get data and synchronize those values with the internet.
